Leave Your Firewood At Home

Buy It Where You Burn It

Don't Give Bugs a Free Ride!

Leave Your Firewood At Home

Hauling insect-infested firewood from home dramatically speeds up the spread of invasive insects that harm our forests. An invasive insect population might spread a few miles on its own in a single year. But moving infested wood can spread the same pest hundreds of miles in a single day.

- Pests can be in, on, or under the bark or in the wood.
- Help protect Maine's forests—buy wood where you burn it.
- For more information, visit: www.maine.gov/firewood or send an e-mail to forestinfo@maine.gov.
