Forest Ecosystems

FOREVER NEW, FOREVER CHANGING

MIDDLE-AGED FOREST

YOUNG FOREST

MATURE FOREST

Biodiversity

As habitat changes or dies, an animal population experiences the relationship by playing the habitat game. [See here!](#)

Energy Flow & Nutrient Cycling

The connections between living and nonliving parts of an ecosystem are vital. Trace these connections in [The Food Web](#).

Forest Succession

Habitats change naturally over time. Demonstrate this concept using real-life examples in [Learning Through Life Succession](#).

People Are Part Of The Ecosystem

A forest can be managed for many uses. By your hand of planning in [Forest Connections](#).
